Business Requirements Document (BRD)

ReferrAI – AI-Native Referral & Commission Platform

Version: 2.0

Document Type: Business Requirements Document

---

1. Executive Summary

ReferrAI is a standalone AI-native referral and commission management platform designed to help businesses acquire customers, manage partners, automate commission workflows, and optimize referral programs through configurable business rules and intelligent analytics.

The platform is designed as a reusable and configurable product rather than a business-specific solution. It will support referral programs, affiliate programs, commission-based partnerships, and customer acquisition campaigns for multiple industries and business models.

ReferrAI aims to differentiate itself from existing affiliate and referral platforms through AI-driven insights, fraud detection, commission optimization, and business rule automation.

---

2. Business Objectives

Primary Objectives

- Create a standalone referral and commission platform.
- Enable businesses to launch referral and affiliate programs quickly.
- Provide configurable commission structures.
- Automate commission calculations and payouts.
- Improve partner engagement and performance tracking.
- Deliver AI-powered insights and recommendations.
- Support future SaaS deployment and multi-business usage.

Secondary Objectives

- Reduce manual commission management.
- Improve transparency for partners.
- Provide fraud detection capabilities.
- Support referral-driven customer acquisition.
- Provide campaign and performance analytics.

---

3. Problem Statement

Many businesses rely on spreadsheets, manual tracking, and fragmented systems to manage referral and affiliate programs.

Common challenges include:

- Manual commission calculations.
- Lack of referral attribution visibility.
- Fraudulent referrals.
- Inflexible commission structures.
- Limited reporting and analytics.
- High operational overhead.

ReferrAI addresses these challenges through a configurable and AI-native platform.

---

4. Scope

In Scope

- Monitoring earnings
- Managing referral activities

---

6. Business Requirements

Referral Program Requirements

The platform shall support:

- Referral links
- Referral codes
- Referral QR codes
- Referral tracking
- Referral attribution

The platform shall support configurable attribution models including:

- Last-click attribution
- First-click attribution
- Future support for multi-touch attribution

Commission Requirements

The platform shall support:

- Percentage commissions
- Fixed commissions
- Recurring commissions
- Tier-based commissions

Commission structures must be configurable by administrators.

Incentive Requirements

Businesses shall have the ability to configure:

- No customer incentive
- Signup rewards
- Discount-based rewards
- Credit-based rewards
- Campaign-specific incentives

Referral discounts shall not be mandatory.

Partner Tier Requirements

The platform shall support:

- Custom tier structures
- Automatic tier upgrades

- Tier-specific benefits
- Performance-based incentives

Withdrawal Requirements

The platform shall support:

- Wallet balances
- Withdrawal requests
- Approval workflows
- Payout tracking

Minimum withdrawal rules shall be configurable.

---

7. Business Rules

The platform shall provide configurable business rules.

Examples include:

- Commission percentages
- Commission approval periods
- Referral eligibility
- Customer reward eligibility
- Withdrawal thresholds
- Tier qualification criteria

Business rules must be modifiable without requiring software code changes.

---

8. AI-Native Platform Vision

ReferrAI will leverage artificial intelligence to provide:

Referral Intelligence

- Referral conversion analysis
- Referral quality scoring
- Conversion predictions

Partner Intelligence

- Partner ranking
- Partner health scoring

- Growth opportunity recommendations

Commission Intelligence

- Commission optimization suggestions
- Incentive effectiveness analysis

Fraud Intelligence

- Fraud detection
- Suspicious activity detection
- Risk scoring

Campaign Intelligence

- Campaign recommendations
- Campaign performance forecasting

---

9. Reporting Requirements

The platform shall provide:

Referral Reports

- Referral volume
- Referral conversions
- Referral sources

Commission Reports

- Commission earned
- Commission paid
- Commission pending

Partner Reports

- Partner performance
- Partner rankings
- Tier movement

Financial Reports

- Payout reports
- Withdrawal reports
- Revenue reports

Fraud Reports

- Fraud incidents
- Suspicious activities
- Risk assessments

---

10. Competitive Analysis

Key Competitors

- Commission Junction (CJ)
- Impact.com
- PartnerStack
- ReferralCandy
- Tapfiliate
- FirstPromoter

Differentiation Strategy

ReferrAI will differentiate through:

- AI-native architecture
- Configurable business rules
- Intelligent fraud detection
- Commission optimization
- Referral intelligence
- Partner intelligence
- Campaign recommendations

---

11. Success Criteria

The platform will be considered successful if:

- Businesses can launch referral programs without custom development.
- Commission processing is automated.
- Referral tracking accuracy exceeds defined thresholds.
- Fraud incidents are reduced through automated detection.
- AI recommendations improve campaign performance.
- The platform can be adapted to multiple business models without code changes.

---

12. Future Vision

ReferrAI will evolve into a configurable referral and commission operating system capable of serving:

- E-commerce businesses
- Subscription businesses
- SaaS companies
- Service providers
- Influencer programs
- Affiliate networks

The platform shall be designed for future multi-tenant SaaS deployment.
